CHARTERED SURVEYORS

Parent to HomeReportScotland.scot

- 1. Single Survey
- 2. Energy Report
- 3. Property Questionnaire

### **Survey report on:**

Property Address	Tom Na Craggan . Glenlivet Ballindalloch AB37 9EB
Customer	Executors Of Alfred Wright
Date of Inspection	04/03/2025
Prepared by	Donna Shields Harvey Donaldson & Gibson Chartered Surveyors

#### TERMS AND CONDITIONS

#### **PART 1 - GENERAL**

#### 1.1 THE SURVEYORS

The Seller has engaged the Surveyors to provide the Single Survey Report and a generic Mortgage Valuation Report for Lending Purposes. The Seller has also engaged the Surveyors to provide an Energy Report in the format prescribed by the accredited Energy Company.

The Surveyors are authorised to provide a transcript or retype of the generic Mortgage Valuation Report on to Lender specific pro-forma. Transcript reports are commonly requested by Brokers and Lenders. The transcript report will be in the format required by the Lender but will contain the same information, inspection date and valuation figure as the generic Mortgage Valuation Report and the Single Survey. The Surveyors will decline any transcript request which requires the provision of information additional to the information in the Report and the generic Mortgage Valuation Report until the Seller has conditionally accepted an offer to purchase made in writing.

Once the Seller has conditionally accepted an offer to purchase made in writing, the Purchaser's lender or conveyancer may request that the Surveyors provide general comment on standard appropriate supplementary documentation. In the event of a significant amount of documentation being provided to the Surveyors, an additional fee may be incurred by the Purchaser. Any additional fee will be agreed in writing.

If information is provided to the Surveyors during the conveyancing process which materially affects the valuation stated in the Report and generic Mortgage Valuation Report, the Surveyors reserve the right to reconsider the valuation. Where the Surveyors require to amend the valuation in consequence of such information, they will issue an amended Report and generic Mortgage Valuation Report to the Seller. It is the responsibility of the Seller to ensure that the amended Report and generic Mortgage Valuation Report are transmitted to every prospective Purchaser.

The individual Surveyor will be a member of the Royal Institution of Chartered Surveyors who will have sufficient current local knowledge of the particular market to competently survey, value and report upon Residential Property. <sup>1</sup>

If the Surveyors have had a previous business relationship within the past two years with the Seller or Sellers Agent or relative to the property, they will be obliged to indicate this by checking the adjacent box.

Harvey Donaldson & Gibson is part of the Connells Group. In Scotland, the Connells Group also own Slater Hogg & Howison, Countrywide North and Allen & Harris. Harvey Donaldson & Gibson trades as an entirely separate company and has no financial interest whatsoever in the disposal of the property being inspected. A full list of the Connells group brands is available on https://www.connellsgroup.co.uk/our-group/our-brands/. Harvey Donaldson & Gibson is regulated by RICS for the provision of surveying services. This means we agree to uphold the RICS Rules of Conduct for Firms and all their applicable mandatory professional practice requirements of RICS, which can be found at www.rics.org. As an RICS regulated firm we have committed to cooperating with RICS in ensuring compliance with its standards. The firm's nominated RICS Responsible Principal is Rebecca Freeman FRICS, contact 01332 813096.

The Surveyors have a written complaints handling procedure. This is available from the offices of the Surveyors at the address stated.

#### 1.2 THE REPORT

The Surveyors will not provide an amended Report on the Property, except to correct factual inaccuracies.

The Report will identify the nature and source of information relied upon in its preparation.

The Surveyor shall provide a Market Value of the Property, unless the condition of the Property is such that it would be inappropriate to do so. A final decision on whether a loan will be granted rests with the Lender who may impose retentions in line with their lending criteria. The date of condition and value of the property will be the date of inspection.

Prior to 1 December 2008, Purchasers have normally obtained their own report from their chosen Surveyor. By contrast, a Single Survey is instructed by the Seller and made available to all potential Purchasers in expectation that the successful Purchaser will have relied upon it. The Royal Institution of Chartered Surveyors rules require disclosure of any potential conflict of interest when acting for the Seller and the Purchaser in the same

transaction. The Single Survey may give rise to a conflict of interest and if this is of concern to any party they are advised to seek their own independent advice.

The Report and any expressions or assessments in it are not intended as advice to the Seller or Purchaser or any other person in relation to an asking price or any other sales or marketing decisions.

The Report is based solely on the Property and is not to be relied upon in any manner whatsoever when considering the valuation or condition of any other property.

If certain minor matters are mentioned in the Report it should not be assumed that the Property is free of other minor defects.

Neither the whole nor any part of the Report may be published in any way, reproduced or distributed by any party other than the Seller, prospective purchasers and the Purchaser and their respective professional advisers without the prior written consent of the Surveyors.

#### 1.3 LIABILITY

The Report is prepared with the skill and care reasonably to be expected of a competent residential Surveyor who is a member of the Royal Institution of Chartered Surveyors.

The Report is addressed to the Seller and was prepared in the expectation that it (or a complete copy) along with these Terms and Conditions (or a complete copy) would (or, as the case might be, would have been) be disclosed and delivered to:

- the Seller:
- any person(s) noting an interest in purchasing the Property from the Seller;
- any person(s) who make(s) (or on whose behalf is made) an offer to purchase the Property, whether or not that offer is accepted by the Seller;
- the Purchaser; and
- the professional advisers of any of these.

The Surveyors acknowledge that their duty of skill and care in relation to the Report is owed to the Seller and to the Purchaser. The Surveyors accept no responsibility or liability whatsoever in relation to the Report to persons other than the Seller and the Purchaser. The Seller and Purchaser should be aware that if a Lender seeks to rely on this Report they do so at their own risk. In particular, the Surveyors accept no responsibility or liability whatsoever to any Lender in relation to the Report. Any such Lender relies upon the Report entirely at their own risk.

#### 1.4 GENERIC MORTGAGE VALUATION REPORT

The Surveyors undertake to the Seller that they will prepare a generic Mortgage Valuation Report, which will be issued along with the Single Survey. It is the responsibility of the Seller to ensure that the generic Mortgage Valuation Report is provided to every potential Purchaser.

#### 1.5 TRANSCRIPT MORTGAGE VALUATION FOR LENDING PURPOSES

The Surveyors undertake that on being asked to do so by a prospective purchaser, or his/her professional advisor or Lender, they will prepare a Transcript Mortgage Valuation Report for Lending Purposes on terms and conditions to be agreed between the Surveyors and Lender and solely for the use of the Lender and upon which the Lender may rely. The decision as to whether finance will be provided is entirely a matter for the Lender. The Transcript Mortgage Valuation Report will be prepared from information contained in the Report and the generic Mortgage Valuation Report.<sup>2</sup>

#### 1.6 INTELLECTUAL PROPERTY

All intellectual property rights whatsoever (including copyright) in and to the Report, excluding the headings and rubrics, are the exclusive property of the Surveyors and shall remain their exclusive property unless they assign the same to any other party in writing.

#### 1.7 PAYMENT

The Surveyors are entitled to refrain from delivering the Report to anyone until the fee and other charges for it notified to the Seller have been paid. Additional fees will be charged for subsequent inspections and Reports.

#### 1.8 CANCELLATION

The Seller will be entitled to cancel the inspection by notifying the Surveyor's office at any time before the day of the inspection.

The Surveyor will be entitled not to proceed with the inspection (and will so report promptly to the Seller) if after arriving at the property, the Surveyor concludes that it is of a type of construction of which the surveyor has insufficient specialist knowledge to be able to provide the inspection satisfactorily. The Surveyor will also be entitled not to proceed if after arriving at the property, the surveyor concludes that the property is exempt under Part 3 of The Housing (Scotland) Act 2006 as detailed in the (Prescribed Documents) Regulations 2008. If there is a potential threat to their health or personal safety, the inspection may be postponed or cancelled, at the Surveyor's discretion.

In the case of cancellation or the inspection not proceeding, the Surveyor will refund any fees paid by the Seller for the inspection and Report, except for expenses reasonably incurred and any fee due in light of the final paragraph of this section.

In the case of cancellation by the Seller, for whatever reason, after the inspection has taken place but before a written report is issued, the Surveyor will be entitled to raise an Invoice equivalent to 80% of the agreed fee.

#### 1.9 PRECEDENCE

If there is any incompatibility between these Terms and Conditions and the Report, these Terms and Conditions take precedence.

#### 1.10 DEFINITIONS

- the "Lender" is the party who has provided or intends or proposes to provide financial assistance to the Purchaser towards the purchase of the Property and in whose favour a standard security will be granted over the Property;
- the "Transcript Mortgage Valuation Report for Lending Purposes" means a separate report, prepared by the Surveyor, prepared from information in the Report and the generic Mortgage Valuation Report, but in a style and format required by the Lender. The Transcript Mortgage Valuation Report for Lending Purposes will be prepared with the skill and care reasonably to be expected from a surveyor who is a member of the Royal Institution of Chartered Surveyors and who is competent to survey, value and report on the Property;
- the "Generic Mortgage Valuation Report" means a separate report, prepared by the Surveyor from information in the Report but in the Surveyor's own format.
- the "Market Value" is the estimated amount for which a property should exchange on the date of valuation between a willing buyer and a willing seller in an arm's-length transaction after proper marketing wherein the parties had each acted knowledgeably, prudently and without compulsion
- the "Property" is the property which forms the subject of the Report;
- the "Purchaser" is the person (or persons) who enters into a contract to buy the Property from the Seller;
- "prospective Purchaser" is anyone considering buying the Property.
- the "Report" is the report, of the kind described in Part 2 of these Terms and Conditions and in the form set out in part 1 of Schedule 1 of the Housing (Scotland) Act 2006 (Prescribed Documents) Regulations 2008;
- the "Seller" is/are the proprietor(s) of the Property;
- the "Surveyor" is the author of the Report on the Property; and
- the "Surveyors" are the firm or company of which the Surveyor is an employee, director, member or partner (unless the Surveyor is not an employee, director, member or partner, when the "Surveyors" means the Surveyor) whose details are set out at the head of the Report.
- the "Energy Report" is the advice given by the accredited Energy Company, based on information collected by the Surveyor during the Inspection, and also includes an Energy Performance Certificate, in a Government approved format.

<sup>&</sup>lt;sup>1</sup>Which shall be in accordance with the current RICS Valuation Standards (the Red Book) and RICS Codes of Conduct

<sup>&</sup>lt;sup>2</sup>Which shall be in accordance with the current RICS Valuation Standards (the Red Book) and RICS Rules of Conduct.

#### PART 2 – DESCRIPTION OF THE REPORT

#### 2.1 THE SERVICE

The Single Survey is a Report by an independent Surveyor, prepared in an objective way regarding the condition and value of the Property on the day of the inspection, and who is a member of the Royal Institution of Chartered Surveyors. It includes an Energy Report as required by Statute and this is in the format of the accredited Energy Company. In addition, the Surveyor has agreed to supply a generic Mortgage Valuation Report.

#### 2.2 THE INSPECTION

The Inspection is a general surface examination of those parts of the Property which are accessible: in other words, visible and readily available for examination from ground and floor levels, without risk of causing damage to the Property or injury to the Surveyor.

All references to visual inspection refer to an inspection from within the property at floor level and from ground level within the site and adjoining public areas, without the need to move any obstructions. Any references to left or right are taken facing the front of the property.

The Inspection is carried out with the Seller's permission, without causing damage to the building or contents. Furniture, stored items and insulation are not moved.

Unless identified in the report the Surveyor will assume that no harmful or hazardous materials have been used in the construction. The presence or possible consequences of any site contamination will not be researched.

The Surveyor will not carry out an asbestos inspection, and will not be acting as an asbestos inspector in completing a Single Survey of properties that may fall within the Control of Asbestos in the Workplace Regulations. In the case of flats it will be assumed that there is a duty holder, as defined in the Regulations and that a Register of Asbestos and effective Management Plan is in place, which does not require any expenditure, or pose a significant risk to health. No enquiry of the duty holder will be made.

#### 2.3 THE REPORT

The Report will be prepared by the Surveyor who carried out the property inspection and will describe various aspects of the property as defined by the headings of the Single Survey report with the comments being general and unbiased. The report on the location, style and condition of the property, will be concise and will be restricted to matters that could have a material effect upon value and will omit items that, in the Surveyor's opinion, are not significant. If certain minor matters are mentioned, it should not be interpreted that the property is free of any other minor defects.

Throughout the report, the following repair categories will be used to give an overall opinion of the state of repair and condition of the property.

- 2.3.1 Category 3: Urgent repairs or replacement are needed now. Failure to deal with them may cause problems to other parts of the property or cause a safety hazard. Estimates for repairs or replacement are needed now.
- 2.3.2 Category 2: Repairs or replacement requiring future attention, but estimates are still advised.
- 2.3.3 Category 1: No immediate action or repair is needed.

WARNING: If left unattended, even for a relatively short period, Category 2 repairs can rapidly develop into more serious Category 3 repairs. The existence of Category 2 or Category 3 repairs may have an adverse effect on marketability, value and the sale price ultimately achieved for the property. This is particularly true during slow market conditions when the effect can be considerable.

Parts of the property, which cannot be seen or accessed, will not be reported upon and this will be stated. If the Surveyor suspects that a defect may exist within an unexposed area and which could have a material effect upon the value, he may recommend further investigation by specialist contractors.

#### 2.4 SERVICES

Surveyors are not equipped or qualified to test the services and therefore no comment can be interpreted as implying that the design, installation and function of the services are in accordance/compliance with regulations, safety and efficiency expectations. However, comment is made where there is cause to suspect significant defects or shortcomings with the installations. No tests are made of any services or appliances.

#### 2.5 ACCESSIBILITY

A section is included to help identify the basic information interested parties need to know to decide whether to view a property.

#### 2.6 ENERGY REPORT

A section is included that makes provision for an Energy Report, relative to the property. The Surveyor will collect physical data from the property and provide such data in a format required by an accredited Energy Company. The Surveyor cannot of course accept liability for any advice given by the Energy Company.

#### 2.7 VALUATION AND CONVEYANCER ISSUES

The last section of the Report contains matters considered relevant to the Conveyancer (Solicitor). It also contains the Surveyor's opinion both of the market value of the property and of the re-instatement cost, as defined below.

"Market Value" The estimated amount for which a property should exchange on the date of valuation between a willing buyer and a willing seller in an arm's-length transaction after proper marketing wherein the parties had each acted knowledgeably, prudently and without compulsion. In arriving at the opinion of the Market Value the Surveyor also makes various standard assumptions covering, for example, vacant possession; tenure and other legal considerations; contamination and hazardous materials; the condition of un-inspected parts; the right to use mains services; and the exclusion of curtains, carpets etc. from the valuation. In the case of flats, the following further assumptions are made that:

- There are rights of access and exit over all communal roadways, corridors, stairways etc. and to use communal grounds, parking areas, and other facilities;
- There are no particularly troublesome or unusual legal restrictions;
- There is no current dispute between the occupiers of the flats or any outstanding claims or losses; and the costs of repairs to the building are shared among the co-proprietors on an equitable basis.

Any additional assumption, or any found not to apply, is reported.

"Re-instatement cost" is an estimate for insurance purposes of the current cost of rebuilding the Property in its present form unless otherwise stated. This includes the cost of rebuilding the garage and permanent outbuildings, site clearance and professional fees, but excludes VAT (except on the fees).

Sellers or prospective Purchasers may consider it prudent to instruct a reinspection and revaluation after a period of 12 weeks (or sooner if appropriate) to reflect changing circumstances in the market and/or in the physical condition of the Property.

#### 1. INFORMATION AND SCOPE OF INSPECTION

This section tells you about the type, accommodation, neighbourhood, age and construction of the property. It also tells you about the extent of the inspection and highlights anything that the Surveyor could not inspect.

All references to visual inspection refer to an inspection from within the property without moving any obstructions and externally from ground level within the site and adjoining public areas. Any references to left or right in a description of the exterior of the property refer to the view of someone standing facing that part of the property from the outside.

The inspection is carried out without causing damage to the building or its contents and without endangering the occupiers or the Surveyor. Heavy furniture, stored items and insulation are not moved. Unless identified in the report the Surveyor will assume that no harmful or hazardous materials or techniques have been used in the construction. The presence or possible consequences of any site contamination will not be researched.

Services such as TV/cable connection, internet connection, swimming pools and other leisure facilities will not be inspected or reported on.

Description	The subjects comprise a single storey detached bungalow.
Accommodation	Ground floor: Entrance vestibule, hall, lounge, dining room, kitchen, 5 bedrooms, 2 shower rooms, store room, conservatory, utility room.
Gross internal floor area (sqm)	153
Neighbourhood and location	The subjects are located in a semi-rural location. Surrounding properties are of a mixed style and design. There is a limited range of amenities nearby. A wider range of amenities is available within commuting distance.  The subjects are accessed by way of an adopted road.
Age	Approximately 63 years.
Weather	It was dry at time of inspection.
Chimney stacks	Visually inspected with the aid of binoculars where appropriate.  The chimney head is of rendered masonry construction. The chimney flashings are carried in lead.

#### **Roofing including roof space**

Sloping roofs were visually inspected with the aid of binoculars where appropriate.

Flat roofs were visually inspected from vantage points within the property and where safe and reasonable to do so from a 3m ladder externally.

Roof spaces were visually inspected and were entered where there was safe and reasonable access, normally defined as being from a 3m ladder within the property. If this is not possible, then physical access to the roof space may be taken by other means if the Surveyor deems it safe and reasonable to do so.

The flat roof was only partially visible at the time of inspection.

Our inspection of the roof void was restricted to a head and shoulders inspection only due to thickly laid insulation.

The roof is pitched, timber supported and is overlaid with concrete tiles. The roof incorporates a uPVC verge detail. There are 16 solar photovoltaic panels (P.V.) fitted to the the roof.

There is a flat roof over the vestibule which has a felt covering.

#### **Rainwater fittings**

Visually inspected with the aid of binoculars where appropriate.

It will be appreciated that the inspection was carried out during dry weather conditions. Sometimes defects in rainwater goods are only apparent during, or after heavy rainfall.

The gutters and downpipes are of uPVC construction.

#### Main walls

Visually inspected with the aid of binoculars where appropriate.

Foundations and concealed parts were not exposed or inspected.

The supporting walls are of prefabricated reinforced concrete panel construction (PRC). The system build type is 'Dorran'. This is a non-traditional type of construction.

At some point in the past, the walls have been upgraded, e.g. expanded metal lath with a render finish applied, or similar. The walls incorporate some timber clad sections.

The total wall thickness is approximately 150mm..

### Windows, external doors and Internal and external doors were opened and closed where keys joinery were available. Random windows were opened and closed where possible. Doors and windows were not forced open. Window surrounds are timber. The main windows are replacement units of uPVC and metal design, incorporating double glazed units. There are single glazed transoms remaining. The doors are of uPVC design, incorporating double glazed units. Eaves details are carried in uPVC and external joinery is uPVC and timber. **External decorations** Visually inspected. The external joinery is finished in paint coatings, where applicable. **Conservatories / porches** Visually inspected. The base could not be inspected due to timber decking. There is a uPVC porch to the front elevation which incorporates double glazing, under a sloped polycarbonate roof. Communal areas None **Garages and permanent** Visually inspected. outbuildings The garage was locked at the time of our inspection, therefore we are unable to comment on its internal condition. There is a large outbuilding of a similar 'Dorran' construction to the main bungalow. The walls are of pre-cast concrete panel construction located under a pitched roof, overlaid in a tile covering. The outbuilding contains a double garage and an office suite comprising three rooms, a store room and a separate W.C. Plug-in electric heaters were noted, but no checks were made. The office suite is approximately 35m2, measured internally. There is a large attached wood store of a basic type which is of

timber and profiled metal construction. There is also a greenhouse.

Outside areas and boundaries	Visually inspected.
	The property has private garden grounds to the front, rear and sides which are laid to lawn, planted, paved or laid with Tarmac.
	Boundaries are formed in timber and post & wire fences.
	There is a raised timber deck structure with ramp.
Ceilings	Visually inspected from floor level.
	Ceilings within the property are of plasterboard materials.
Internal walls	Visually inspected from floor level.
	Using a moisture meter, walls were randomly tested for dampness where considered appropriate.
	The internal walls are of stud design, lined with plasterboard.
Floors including sub floors	Surfaces of exposed floors were visually inspected. No carpets or floor coverings were lifted. The property has fully fitted floor coverings throughout (except for one shower room), which restricted the scope of our inspection. Sub-floor areas were inspected only to the extent visible from a readily accessible and unfixed hatch by way of an inverted "head and shoulders" inspection at the access point; No sub-floor inspection was possible due to there being no apparent means of access.  The floors are of suspended timber construction.
Internal joinery and kitchen fittings	Built-in cupboards were looked into but no stored items were moved.
	Kitchen units were visually inspected excluding appliances.
	Internal joinery comprises timber skirtings, door facings and door surrounds. The doors are a mixture of types including moulded and flush faced units and timber/glazed units.
	Kitchen fittings comprise a range of wall and base units and work surfaces.

Chimney breasts and fireplaces	Visually inspected.  No testing of the flues or fittings was carried out.  The chimney breast is dry lined.  There is a closed solid fuel fire in the lounge. No checks were made. The fireplace is tiled.
Internal decorations	Visually inspected.  The ceilings and walls are painted and papered. The internal joinery is painted and finished with a decorative stain.
Cellars	None
Electricity	Accessible parts of the wiring were visually inspected without removing fittings. No tests whatsoever were carried out to the system or appliances. Visual inspection does not assess any services to make sure they work properly and efficiently and meet modern standards. If any services are turned off, the surveyor will state that in the report and will not turn them on.  Mains electricity is connected. The meter and consumer unit are in the hall cupboard. Wiring, where visible, is sheathed in PVC. The solar PV array would appear to be connected to the meter.
Gas	Accessible parts of the system were visually inspected without removing fittings. No tests whatsoever were carried out to the system or appliances. Visual inspection does not assess any services to make sure they work properly and efficiently and meet modern standards. If any services are turned off, the surveyor will state that in the report and will not turn them on.  Mains gas is understood to be connected. The gas meter is located within an external meter box.

## Water, plumbing and bathroom fittings

# Visual inspection of the accessible pipework, water tank or cylinders (if applicable) and fittings without removing any insulation.

The water supply is private, and may be via an exclusive or shared source, however, the details could not be confirmed.

The visible pipework is copper and plastic.

The main shower room contains a three piece suite consisting of a shower, wash-hand basin and toilet.

The second shower room contains a three piece suite consisting of a shower enclosure, wash-hand basin and toilet.

The office suite W.C. has a wash-hand basin and toilet.

#### Heating and hot water

Accessible parts of the system were visually inspected apart from communal systems, which were not inspected.

No tests whatsoever were carried out to the system or appliances.

The system was running at the time of our inspection.

The property is centrally heated by means of a gas fired system, located in the utility room. The system comprises a boiler and hot water cylinder. Hot water is provided from the system and appears to be supplemented by the solar panels.

Heating to rooms is provided by water-filled radiators.

#### **Drainage**

Drainage covers etc were not lifted.

Neither drains nor drainage systems were tested.

Drainage, we understand is to a septic tank which lies within the feu. This was not specifically located, checked or tested.

#### Fire, smoke and burglar alarms

Visually inspected.

No tests whatsoever were carried out to the system or appliances.

The property has smoke detection devices installed.

Scottish government regulations came into effect on 1st February 2022 which requires each property to have linked smoke and heat detectors and if gas/carbon burning appliances are present then a carbon monoxide alarm fitted. Purchasers should satisfy themselves with regards to compliance.

#### Any additional limits to inspection

The property was inspected within the limits imposed by fitted floor coverings. It will be appreciated that parts of the property, which are covered, unexposed or inaccessible, cannot be guaranteed to be free from defect.

This report does not constitute a full and detailed description of the property and a structural investigation was not carried out. No inspection was undertaken of woodwork or other parts of the structure which are covered, unexposed or otherwise inaccessible and as a result no guarantee can be given that such parts of the structure are free from rot, beetle or other defects.

No removal of internal linings has been carried out in order to ascertain the condition of hidden parts and no warranty can be given regarding the areas not specifically referred to in this report.

The external building fabric has been inspected from ground level only from the subjects grounds and where possible from adjoining public property. Exposure work has not been carried out.

It was dry on the date of inspection. Leakage and water penetration may only be visible to building components such as roof spaces, rainwater goods, around chimney breasts, window openings, etc., during or immediately after, adverse weather conditions. Sometimes defects in rainwater goods are only apparent during, or after heavy rainfall.

The report does not include an asbestos inspection. Asbestos was widely used in the building industry until around 2000, when it became a banned substance. If the possibility of asbestos based products has been reported and you have concerns you should engage a qualified asbestos surveyor.

An inspection for Japanese Knotweed was not carried out. It is assumed that there is no Japanese Knotweed within the boundaries of the property or its neighbouring property.

Normal maintenance is not treated as a repair for the purposes of the Single Survey. When a category 1 rating is provided this means the property must continue to be maintained in the normal way.

### Sectional Diagram showing elements of a typical house

Reference may be made in this report to some or all of the above component parts of the property. This diagram may assist you in locating and understanding these items.

- **Chimney pots**
- Coping stone
- Chimney head
- Flashing
- Ridge ventilation
- 6 Ridge board
- 7 Slates / tiles
- 8 Valley guttering
- 9 Dormer projection
- 10 Dormer flashing
- **Dormer cheeks**
- 12 Sarking
- 13) Roof felt
- (14) Trusses
- (15) Collar
- 16 Insulation
- 17) Parapet gutter
- (18) Eaves guttering
- Rainwater downpipe
- 20 Verge boards /skews
- (21) Soffit boards
- (22) Partition wall
- 23) Lath / plaster
- 24) Chimney breast
- 25) Window pointing
- (26) Window sills
- (27) Rendering
- Brickwork / pointing
- 29 Bay window projection
- (30) Lintels
- 31) Cavity walls / wall ties
- 32) Subfloor ventilator
- 33 Damp proof course
- 34) Base course
- 35) Foundations
- (36) Solum
- 37) Floor joists
- 38) Floorboards
- (39) Water tank
- (40) Hot water tank

### 2. CONDITION

This section identifies problems and tells you about the urgency of any repairs by using one of the following 3 categories:

Category 3	Category 2	Category 1
Urgent repairs or replacement are needed now. Failure to deal with them may cause problems to other parts of the property or cause a safety hazard. Estimates for repairs or replacement are needed now.	future attention, but estimates are still advised.	No immediate action or repair is needed.

Structural movement	
Repair category:	1
Notes	All buildings move daily and seasonally as a result of external factors such as gravity, temperature, moisture content and vibrations. Consequently most buildings will have minor non structural cracks related to these factors. Minor cracks can be filled during normal redecoration but often recur seasonally due to normal movement in a building. Non structural cracks of this nature will not be recorded or reported.  No obvious significant structural movement noted, on the basis of a single inspection.

Dampness, rot and infestation	
Repair category:	
Notes	An electronic moisture meter was used to measure levels of dampness, at random locations, to lower wall surfaces and floors, where accessible and without moving furniture or lifting floor coverings, if present.
	No obvious significant dampness, timber decay or infestation noted, within the limitations imposed on the inspection. Moisture meter readings were found to be within an acceptable range.

Chimney stacks	
Repair category:	2
Notes	General damage to chimney head rendering was noted, and the need for cutting back to the bare masonry and recoating should not be discounted. This is likely to be a progressive defect if left unattended.  The chimney pot is cracked.  It should be noted that unused chimney heads are a common source of water ingress with the resultant risk of deterioration to the brickwork and surrounding timbers within the roof void.

Roofing including roof space		
Repair category:	1	
Notes	Roof tiling, where viewed from ground level, appears to have been laid to generally even courses with no obvious significant defects noted, allowing for normal age and weathering. It is possible that the roof has been upgraded in the past.  Purchasers should note that concrete roof tiles are typically guaranteed for 30 years but have a reasonable life expectation around 50 years according to the BRE.  Life expectancy will often depend on weathering and damage from the prevailing weather. Ongoing and increasing maintenance expenditure should be anticipated.  The flat roof is weathered. The vestibule ceiling shows signs of damage, indicating previous water ingress or condensation. It should be fully appreciated that a flat roof, even when new does have a limited life and always requires regular and careful ongoing maintenance to ensure it remains in a wind and watertight condition.  No obvious significant defects were noted during the inspection of the roof space, within the limitations imposed on the inspection.	

Rainwater fittings		
Repair category:	1	
Notes	No significant disrepair was noted to the rainwater goods, allowing for normal weathering.  Allowing leaves, moss, and other debris to accumulate and create blockages is one of the most frequent causes of gutter-related dampness problems. The weight of the accumulated material can cause gutters to leak at joints or even to collapse completely. This may be prevented by cleaning gutters frequently, preferably twice a year.	

Main walls	
Repair category:	2
Notes	The property is of non-traditional prefabricated reinforced concrete panel construction (PRC) construction; Dorran. It would be prudent to instruct a structural engineer to carry out a full inspection the entire subjects, commenting on its condition and life expectancy. It should also be noted that lending will be heavily restricted for this type of construction and purchasers should check with their lender in the first instance.

Windows, external doors and joinery	
Repair category:	2
Notes	The windows are not modern and the life expectancy of same should be fully appreciated.  Double glazed sealed units were noted to have failed in places, as a result of defective seals, allowing condensation to build between the panes. Repair or replacement is required.  External timbers show signs of weathering and flaking in places. No obvious significant defects were noted to the uPVC eaves details, allowing for normal weathering.

External decorations	
Repair category:	2
Notes	Weathering and flaking paintwork was noted to the external joinery.

Conservatories / porches	
Repair category:	1
Notes	No obvious significant defects were noted to the porch, allowing for normal age and wear.  It will be appreciated that conservatories and porches have a limited lifespan and ongoing maintenance is required to keep them in a wind and water-tight condition.

Communal areas	
Repair category:	
Notes	Not applicable

Garages and permanent outbuildings	
Repair category:	2
Notes	The garage doors are worn. Chipped tiles were noted to the outbuilding roof. The roof appears undulated in places. Misted double glazed units were noted. Rainwater goods are stained and external paintwork is flaked in places. Staining was noted to the ceilings, indicating water ingress or plumbing leakage. It will be appreciated that upgrade and/or overhaul will be required.  The outbuilding is of non-traditional prefabricated reinforced concrete panel construction (PRC) construction; Dorran. It would be prudent to instruct a structural engineer to carry out a full inspection the entire subjects, commenting on its condition and life expectancy.  The wood store appears fit for the desired purpose. The greenhouse is in poor condition.

Outside areas and boundaries	
Repair category:	2
Notes	Post & wire fencing is warped in places. Timber fences are weathered in places. Gates have been removed.  Concrete steps are weathered and have deteriorated in places.  There are a number of trees growing within potential influencing distance of the property. The trees are growing within the subjects garden grounds. Trees will grow progressively larger with time and the risk of damage will increase. Trees should be managed to prevent them from increasing in size. Tree roots can cause damage to structures and services, particularly in shrinkable soils. The requirement for gutter maintenance in the autumn should also be recognised, along with the risk of storm damage.

Ceilings	
Repair category:	2
Notes	A hole was noted in the vestibule. Flaking was noted to one of the shower room ceilings and to the vestibule ceiling. There are areas of hairline cracking, visible taping and minor blemishes to the ceiling surfaces. These can be attended to during the course of normal redecoration.

Internal walls	
Repair category:	1
Notes	The internal wall finishes appear generally sound with only minor blemishes noted.  The removal of wallpaper is likely to result in the necessity for plaster repairs.

Floors including sub floors	
Repair category:	2
Notes	The uncovered shower room floor is stained and a defect was noted at the shower base. Moisture meter readings at the stained areas were found to be within an acceptable range.  No further or obvious significant defects were noted to floors, within the limitations of the inspection.

Internal joinery and kitchen fittings	
Repair category:	1
Notes	No obvious significant defects were noted to internal joinery or kitchen fittings.  The internal glazing is not kitemarked as toughened glass. This can be considered to be a Health and Safety risk, particularly where there are young children present.

Chimney breast and fire places	
Repair category:	•
Notes	No obvious significant defects were noted to the chimney breast, within the limitations of the inspection.  The internal condition and serviceability of any flue cannot be determined from a visual inspection. Old unlined flues will inevitably deteriorate with age as the acidic products of combustion erode the bricks and mortar joints. As a result they may not be completely smoke and fire tight. For this reason they should be cleaned and smoke tested before use.

Internal decorations	
Repair category:	2
Notes	Localised areas of peeling wallpaper, staining and flaking paint were noted.

Cellars	
Repair category:	
Notes	Not applicable

Electricity					
Repair category:	2				
Notes	It is likely that only the most recently rewired properties will have electrical installations that fully comply with current regulations.  A mid-aged consumer unit and dated rewireable fuses were noted. Rewireable fuses do not comply with current regulations.  There is no evidence of a recent test (E.I.C.R.). The electrical installation in the main bungalow and the outbuilding should be inspected by a qualified electrician. The need for upgrades and/or full overhaul should be fully appreciated.  It is recommended good practice that all electrical installations should be checked periodically, approximately every ten years or when a property changes hands. This should be regarded as a routine safety and maintenance check.				

Gas				
Repair category:	1			
Notes	No obvious significant defects noted to the gas installation.  All gas appliances should be tested and thereafter maintained by a Gas Safe registered contractor on an annual basis. This should be regarded as a routine maintenance and safety check.			

Water, plumbing and bathroom fittings					
Repair category:	2				
Notes	The second shower room fittings are of a dated design and will likely require replacement. Spillage/staining was noted to the floors. No obvious significant defects were noted to the main shower room or kitchen fittings, allowing for normal age and wear.  It is essential that all wall linings, tile grout, seals, etc are maintained in good condition. Failure to do so can lead to concealed defects behind wall finishes, and below the shower tray.  As the property has a private water supply, checks regarding the water quality should be carried out to ensure it is in compliance with the relevant regulations. Improvement works can be costly. It is assumed that the flow has been continuous for at least 10 years and the water is fit for human consumption.				

Heating and hot water					
Repair category:	1				
Notes	No obvious significant defects were noted to the heating and hot water system, although this has not been tested. It is recommended good practice that boilers are serviced on an annual basis by an appropriately qualified person. The boiler's service history should be checked by referring to the service records. If there is no record of a recent service, the boiler should be checked by an appropriately qualified person.  Informed opinion suggests that boilers have a life expectancy between 10 and 20 years depending on the quality of the boiler and whether or not regular maintenance has been carried out. Future repair or replacement should be anticipated.				

Drainage				
Repair category:	1			
Notes	No obvious significant defects were noted to the drainage system, within the limitations of the inspection.			
	The valuation reported assumes that the septic tank has been registered with and is fully compliant with all requirements of the Scottish Environmental Protection Agency (SEPA), both with regard to the tank and its outfall.			

Set out below is a summary of the condition of the property which is provided for reference only. You should refer to the comments above for detailed information.

Structural movement	Category 3
Dampness, rot and infestation	Urgent repairs or replacement are needed now. Failure to deal with them may cause
Chimney stacks	problems to other parts of the property or
Roofing including roof space	cause a safety hazard. Estimates for repairs or replacement are needed now.
Rainwater fittings	Category 2
Main walls	Repairs or replacement requiring future
Windows, external doors and joinery	attention, but estimates are still advised.
External decorations	Category 1
Conservatories / porches	No immediate action or repair is needed.
Communal areas	
Garages and permanent outbuildings	2
Outside areas and boundaries	2
Ceilings	2
Internal walls	1
Floors including sub floors	2
Internal joinery and kitchen fittings	1
Chimney breasts and fireplaces	1
Internal decorations	2
Cellars	
Electricity	2
Gas	1
Water, plumbing and bathroom fittings	2
Heating and hot water	1
Drainage	1

#### Remember

The cost of repairs may influence the amount someone is prepared to pay for the property. We recommend that relevant estimates and reports are obtained in your own name.

#### Warning

If left unattended, even for a relatively short period, Category 2 repairs can rapidly develop into more serious Category 3 repairs. The existence of Category 2 or Category 3 repairs may have an adverse effect on marketability, value and the sale price ultimately achieved for the property. This is particularly true during slow market conditions where the effect can be considerable.

#### 3. ACCESSIBILITY INFORMATION

#### **Guidance Notes on Accessibility Information**

<u>Three steps or fewer to a main entrance door of the property:</u> In flatted developments the 'main entrance' would be the flat's own entrance door, not the external door to the communal stair. The 'three steps or fewer' are counted from external ground level to the flat's entrance door. Where a lift is present, the count is based on the number of steps climbed when using the lift.

<u>Unrestricted parking within 25 metres:</u> For this purpose, 'Unrestricted parking' includes parking available by means of a parking permit. Restricted parking includes parking that is subject to parking restrictions, as indicated by the presence of solid yellow, red or white lines at the edge of the road or by a parking control sign, parking meters or other coin-operated machines.

1.Which floor(s) is the living accommodation on?	Ground
2.Are there three steps or fewer to a main entrance door of the property?	Yes
3.Is there a lift to the main entrance door of the property?	No
4.Are all door openings greater than 750mm?	No
5.Is there a toilet on the same level as the living room and kitchen?	Yes
6.Is there a toilet on the same level as a bedroom?	Yes
7.Are all rooms on the same level with no internal steps or stairs?	Yes
8. Is there unrestricted parking within 25 metres of an entrance door to the building?	Yes

#### 4. VALUATION AND CONVEYANCER ISSUES

This section highlights information that should be checked with a solicitor or licensed conveyancer. It also gives an opinion of market value and an estimated re-instatement cost for insurance purposes.

#### Matters for a solicitor or licensed conveyancer

The tenure is Outright Ownership.

A porch has been added. External walls have been upgraded. The roof is likely to have been upgraded historically. The valuation assumes the existence of local authority consents, where necessary.

As the property has a private water supply checks regarding the water quality should be carried out to ensure it is in compliance with the relevant regulations and by-laws. It is assumed that the flow has been continuous for at least 10 years and the water is fit for human consumption.

It is understood that drainage is to a septic tank. The valuation reported assumes that the septic tank has been registered with and is fully compliant with all requirements of the Scottish Environmental Protection Agency (SEPA), both with regard to the tank and its outfall.

The outbuilding office suite appears to have been used as a commercial business in the past. The valuation assumes the entire subjects are classified as residential in type/use.

In line with our normal practice, it is specifically assumed that the property and its value are unaffected by any matters which would or should be revealed to a competent Completing Solicitor by a local search and replies to the usual enquiries, or by any statutory notice and planning proposal.

Where defects or repairs have been identified within this report it is recommended that, prior to entering into any legally binding sale or purchases contracts, further specialists advice and estimates should be obtained, to establish the implications, if any, on a potential offer to purchase or the sale price likely to be achieved for the property.

#### Estimated re-instatement cost (£) for insurance purposes

The estimated reinstatement cost for insurance purposes is £575,000 (FIVE HUNDRED AND SEVENTY-FIVE THOUSAND POUNDS). This figure is the estimate of the cost of rebuilding the premises and bears no direct relationship to current market value.

#### Valuation (£) and market comments

In its present condition the opinion of valuation for the Outright Ownership interest with vacant possession on 04/03/2025 is £225,000 (TWO HUNDRED AND TWENTY-FIVE THOUSAND POUNDS).

### **Energy Performance Certificate (EPC)**

**Dwellings** 

### **Scotland**

#### TOM NA CRAGGAN, GLENLIVET, BALLINDALLOCH, AB37 9EB

Dwelling type:Detached bungalowDate of assessment:04 March 2025Date of certificate:09 March 2025

Total floor area: 150 m<sup>2</sup>

Primary Energy Indicator: 320 kWh/m²/year

**Reference number:** 8200-4846-0822-2000-1753 **Type of assessment:** RdSAP, existing dwelling

**Approved Organisation:** Elmhurst

Main heating and fuel: Boiler and radiators, mains

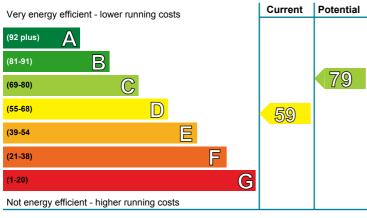

gas

#### You can use this document to:

- Compare current ratings of properties to see which are more energy efficient and environmentally friendly
- Find out how to save energy and money and also reduce CO<sub>2</sub> emissions by improving your home

Estimated energy costs for your home for 3 years*	£8,727	See your recommendations
Over 3 years you could save*	£1,308	report for more information

\* based upon the cost of energy for heating, hot water, lighting and ventilation, calculated using standard assumptions

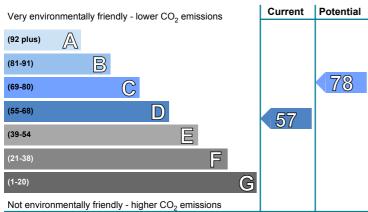

#### **Energy Efficiency Rating**

This graph shows the current efficiency of your home, taking into account both energy efficiency and fuel costs. The higher this rating, the lower your fuel bills are likely to be.

Your current rating is **band D (59)**. The average rating for EPCs in Scotland is **band D (61)**.

The potential rating shows the effect of undertaking all of the improvement measures listed within your recommendations report.

### **Environmental Impact (CO<sub>2</sub>) Rating**

This graph shows the effect of your home on the environment in terms of carbon dioxide ( $CO_2$ ) emissions. The higher the rating, the less impact it has on the environment.

Your current rating is **band D (57)**. The average rating for EPCs in Scotland is **band D (59)**.

The potential rating shows the effect of undertaking all of the improvement measures listed within your recommendations report.

### Top actions you can take to save money and make your home more efficient

Recommended measures	Indicative cost	Typical savings over 3 years
1 Floor insulation (suspended floor)	£800 - £1,200	£858.00
2 Solar water heating	£4,000 - £6,000	£180.00
3 Replacement glazing units	£1,000 - £1,400	£270.00

A full list of recommended improvement measures for your home, together with more information on potential cost and savings and advice to help you carry out improvements can be found in your recommendations report.

To find out more about the recommended measures and other actions you could take today to stop wasting energy and money, visit greenerscotland.org or contact Home Energy Scotland on 0808 808 2282.

THIS PAGE IS THE ENERGY PERFORMANCE CERTIFICATE WHICH MUST BE AFFIXED TO THE DWELLING AND NOT BE REMOVED UNLESS IT IS REPLACED WITH AN UPDATED CERTIFICATE

### Summary of the energy performance related features of this home

This table sets out the results of the survey which lists the current energy-related features of this home. Each element is assessed by the national calculation methodology; 1 star = very poor (least efficient), 2 stars = poor, 3 stars = average, 4 stars = good and 5 stars = very good (most efficient). The assessment does not take into consideration the condition of an element and how well it is working. 'Assumed' means that the insulation could not be inspected and an assumption has been made in the methodology, based on age and type of construction.

Element	Description	Energy Efficiency	Environmental
Walls	System built, as built, no insulation (assumed)	****	****
Roof	Pitched, 300 mm loft insulation	****	****
Floor	Suspended, no insulation (assumed)	_	_
Windows	Fully double glazed	***	<b>★★★☆☆</b>
Main heating	Boiler and radiators, mains gas	****	★★★★☆
Main heating controls	Programmer, room thermostat and TRVs	****	★★★★☆
Secondary heating	Room heaters, dual fuel (mineral and wood)	_	_
Hot water	From main system	****	★★★★☆
Lighting	Low energy lighting in all fixed outlets	****	****

### The energy efficiency rating of your home

Your Energy Efficiency Rating is calculated using the standard UK methodology, RdSAP. This calculates energy used for heating, hot water, lighting and ventilation and then applies fuel costs to that energy use to give an overall rating for your home. The rating is given on a scale of 1 to 100. Other than the cost of fuel for electrical appliances and for cooking, a building with a rating of 100 would cost almost nothing to run.

As we all use our homes in different ways, the energy rating is calculated using standard occupancy assumptions which may be different from the way you use it. The rating also uses national weather information to allow comparison between buildings in different parts of Scotland. However, to make information more relevant to your home, local weather data is used to calculate your energy use, CO<sub>2</sub> emissions, running costs and the savings possible from making improvements.

### The impact of your home on the environment

One of the biggest contributors to global warming is carbon dioxide. The energy we use for heating, lighting and power in our homes produces over a quarter of the UK's carbon dioxide emissions. Different fuels produce different amounts of carbon dioxide for every kilowatt hour (kWh) of energy used. The Environmental Impact Rating of your home is calculated by applying these 'carbon factors' for the fuels you use to your overall energy use.

The calculated emissions for your home are 59 kg CO<sub>2</sub>/m<sup>2</sup>/yr.

The average Scottish household produces about 6 tonnes of carbon dioxide every year. Based on this assessment, heating and lighting this home currently produces approximately 8.8 tonnes of carbon dioxide every year. Adopting recommendations in this report can reduce emissions and protect the environment. If you were to install all of these recommendations this could reduce emissions by 3.5 tonnes per year. You could reduce emissions even more by switching to renewable energy sources.

### Estimated energy costs for this home

	Current energy costs	Potential energy costs	Potential future savings
Heating	£7,773 over 3 years	£6,666 over 3 years	
Hot water	£576 over 3 years	£375 over 3 years	You could
Lighting	£378 over 3 years	£378 over 3 years	save £1,308
Total	£8,727	£7,419	over 3 years

These figures show how much the average household would spend in this property for heating, lighting and hot water. This excludes energy use for running appliances such as TVs, computers and cookers, and the benefits of any electricity generated by this home (for example, from photovoltaic panels). The potential savings in energy costs show the effect of undertaking all of the recommended measures listed below.

#### **Recommendations for improvement**

The measures below will improve the energy and environmental performance of this dwelling. The performance ratings after improvements listed below are cumulative; that is, they assume the improvements have been installed in the order that they appear in the table. Further information about the recommended measures and other simple actions to take today to save money is available from the Home Energy Scotland hotline which can be contacted on 0808 808 2282. Before carrying out work, make sure that the appropriate permissions are obtained, where necessary. This may include permission from a landlord (if you are a tenant) or the need to get a Building Warrant for certain types of work.

Recommended measures		Indicative cost	Typical saving	Rating after improvement		
		indicative cost	per year	Energy	Environment	
1	Floor insulation (suspended floor)	£800 - £1,200	£286	D 63	D 62	
2	Solar water heating	£4,000 - £6,000	£60	D 64	D 64	
3	Replacement glazing units	£1,000 - £1,400	£90	D 65	D 65	
4	Wind turbine	£15,000 - £25,000	£865	C 79	C 78	

#### **Alternative measures**

There are alternative improvement measures which you could also consider for your home. It would be advisable to seek further advice and illustration of the benefits and costs of such measures.

Cavity, internal or external wall insulation

### Choosing the right improvement package

For free and impartial advice on choosing suitable measures for your property, contact the Home Energy Scotland hotline on 0808 808 2282 or go to www.greenerscotland.org.

#### About the recommended measures to improve your home's performance rating

This section offers additional information and advice on the recommended improvement measures for your home

#### 1 Floor insulation (suspended floor)

Insulation of a floor will significantly reduce heat loss; this will improve levels of comfort, reduce energy use and lower fuel bills. Suspended floors can often be insulated from below but must have adequate ventilation to prevent dampness; seek advice about this if unsure. Further information about floor insulation is available from many sources including www.energysavingtrust.org.uk/scotland/Insulation/Floor-insulation. Building regulations generally apply to this work so it is best to check with your local authority building standards department.

#### 2 Solar water heating

A solar water heating panel, usually fixed to the roof, uses the sun to pre-heat the hot water supply. This can significantly reduce the demand on the heating system to provide hot water and hence save fuel and money. Planning permission might be required, building regulations generally apply to this work and a building warrant may be required, so it is best to check these with your local authority. You could be eligible for Renewable Heat Incentive payments which could appreciably increase the savings beyond those shown on your EPC, provided that both the product and the installer are certified by the Microgeneration Certification Scheme (or equivalent). Details of local MCS installers are available at www.microgenerationcertification.org.

#### 3 Replacement glazing units

Replacing existing double-glazed units with new high-performance units. Building regulations require that replacement glazing is to a standard no worse than previous; a building warrant is not required. Planning permission might be required for such work if a building is listed or within a conservation area so it is best to check with your local authority.

#### 4 Wind turbine

A wind turbine provides electricity from wind energy. This electricity is used throughout the home in the same way as the electricity purchased from an energy supplier. Wind turbines are not suitable for all properties. The system's effectiveness depends on local wind speeds and the presence of nearby obstructions, and a site survey should be undertaken by an accredited installer. Planning permission might be required and building regulations generally apply to this work and a building warrant may be required, so it is best to check these with your local authority. The assessment does not include the effect of any Feed-in Tariff which could appreciably increase the savings that are shown on this EPC for a wind turbine, provided that both the product and the installer are certified by the Microgeneration Certification Scheme (or equivalent). Details of local MCS installers are available at www.microgenerationcertification.org.

### Low and zero carbon energy sources

Low and zero carbon (LZC) energy sources are sources of energy that release either very little or no carbon dioxide into the atmosphere when they are used. Installing these sources may help reduce energy bills as well as cutting carbon.

#### LZC energy sources present:

Solar photovoltaics

#### Your home's heat demand

In this section, you can see how much energy you might need to heat your home and provide hot water. These are estimates showing how an average household uses energy. These estimates may not reflect your actual energy use, which could be higher or lower. You might spend more money on heating and hot water if your house is less energy efficient. The table below shows the potential benefit of having your loft and walls insulated. Visit https://energysavingtrust.org.uk/energy-at-home for more information.

Heat demand	Existing dwelling	Impact of loft insulation	Impact of cavity wall insulation	Impact of solid wall insulation
Space heating (kWh per year)	34,123	N/A	N/A	N/A
Water heating (kWh per year)	2,881			

#### **Addendum**

This dwelling is a system built property or some of its walls are of non-conventional construction and requires further investigation to establish the type of construction, the type of wall insulation best suited (cavity insulation or internal/external insulation) and the savings it might deliver. Please contact the Home Energy Scotland hotline on 0808 808 2282 to find out more.

#### **About this document**

This Recommendations Report and the accompanying Energy Performance Certificate are valid for a maximum of ten years. These documents cease to be valid where superseded by a more recent assessment of the same building carried out by a member of an Approved Organisation.

The Energy Performance Certificate and this Recommendations Report for this building were produced following an energy assessment undertaken by an assessor accredited by Elmhurst (www.elmhurstenergy.co.uk), an Approved Organisation Appointed by Scottish Ministers. The certificate has been produced under the Energy Performance of Buildings (Scotland) Regulations 2008 from data lodged to the Scottish EPC register. You can verify the validity of this document by visiting www.scottishepcregister.org.uk and entering the report reference number (RRN) printed at the top of this page.

Assessor's name: Miss Donna Shields

Assessor membership number: EES/019504

Company name/trading name: Harvey Donaldson & Gibson Chartered Surveyors

Address: Kintail House Beechwood Business Park

Highland Inverness IV2 3BW 01463718440 help@hdg.co.

Phone number: 01463718440 Email address: help@hdg.co.uk Related party disclosure: No related party

If you have any concerns regarding the content of this report or the service provided by your assessor you should in the first instance raise these matters with your assessor and with the Approved Organisation to which they belong. All Approved Organisations are required to publish their complaints and disciplinary procedures and details can be found online at the web address given above.

#### Use of this energy performance information

Once lodged by your EPC assessor, this Energy Performance Certificate and Recommendations Report are available to view online at www.scottishepcregister.org.uk, with the facility to search for any single record by entering the property address. This gives everyone access to any current, valid EPC except where a property has a Green Deal Plan, in which case the report reference number (RRN) must first be provided. The energy performance data in these documents, together with other building information gathered during the assessment is held on the Scottish EPC Register and is available to authorised recipients, including organisations delivering energy efficiency and carbon reduction initiatives on behalf of the Scottish and UK governments. A range of data from all assessments undertaken in Scotland is also published periodically by the Scottish Government. Further information on these matters and on Energy Performance Certificates in general, can be found at www.gov.scot/epc.

### Advice and support to improve this property

There is support available, which could help you carry out some of the improvements recommended for this property on page 3 and stop wasting energy and money. For more information, visit greeners cotland.org or contact Home Energy Scotland on 0808 808 2282.

Home Energy Scotland's independent and expert advisors can offer free and impartial advice on all aspects of energy efficiency, renewable energy and more.

Completion date of property	12 March 2025
questionnaire	

#### **Note for sellers**

- Please complete this form carefully. It is important that your answers are correct.
- The information in your answers will help ensure that the sale of your house goes smoothly. Please answer each question with as much detailed information as you can.
- If anything changes after you fill in this questionnaire but before the date of entry for the sale of your house, tell your solicitor or estate agent immediately.

### Information to be given to prospective buyer(s)

1.	Length of ownership			
	How long have you owned the property? N/A			
2.	Council tax			
	Which Council Tax band is your property in? (Please tick)			
	A B C D E F G H			
3.	Parking			
	What are the arrangements for parking at your property? (Please tick all that apply)			
	• Garage X			
	Allocated parking space			
	• Driveway			
	Shared parking			
	• On street			
	Resident permit			
	Metered parking			
	Other (please specify):     No other			
4.	Conservation area			
	Is your property in a designated Conservation Area (that is an area of special architectural or historical interest, the character or	Yes		
	appearance of which it is desirable to preserve or enhance)?	No Don't know	\_X	
5.	Listed buildings			
	Is your property a Listed Building, or contained within one (that is a building recognised and approved as being of special architectural or historical interest)?	Yes No	$\mathbb{Z}$	
6.	Alterations/additions/extensions			
a.	(i) During your time in the property, have you carried out any structural alterations, additions or extensions (for example, provision of an extra bath/shower room, toilet, or bedroom)?	Yes No		

	If you have answered yes, please describe below the changes which you have made:		
	(ii) Did you obtain planning permission, building warrant, completion certificate and other consents for this work? If you have answered yes, the relevant documents will be needed by the purchaser and you should give them to your solicitor as soon as possible for checking. If you do not have the documents yourself, please note below who has these documents and your solicitor or estate agent will arrange to obtain them:	Yes No	
b.	Have you had replacement windows, doors, patio doors or double glazing installed in your property? If you have answered yes, please answer the three questions below:	Yes No	
	(i) Were the replacements the same shape and type as the ones you replaced?	Yes No	
	(ii) Did this work involve any changes to the window or door openings?	Yes No	
	(iii) Please describe the changes made to the windows doors, or approximate dates when the work was completed):  Please give any guarantees which you received for this work to yestate agent.		
7.	Central heating		
a.	Is there a central heating system in your property? (Note: a partial central heating system is one which does not heat all the main rooms of the property — the main living room, the bedroom(s), the hall and the bathroom).  If you have answered yes or partial – what kind of central	Yes No Partial	X
	heating is there? (Examples: gas-fired, solid fuel, electric storage heating, gas warm air).  If you have answered yes, please answer the three questions below:		
	i) When was your central heating system or partial central heating system installed?	Not sure	

	(ii) Do you have a maintenance contract for the central heating system?  If you have answered yes, please give details of the company with which you have a maintenance contract:	Yes No	X
	(iii) When was your maintenance agreement last renewed? (Please provide the month and year).		
8.	Energy Performance Certificate		
	Does your property have an Energy Performance Certificate which is less than 10 years old?	Yes No	
9.	Issues that may have affected your property		
a.	Has there been any storm, flood, fire or other structural damage to your property while you have owned it?	Yes No	
	If you have answered yes, is the damage the subject of any outstanding insurance claim?	Yes No	
b.	Are you aware of the existence of asbestos in your property?		
	If you have answered yes, please give details:	Yes No	

10.	Services				
a. Ple suppli	ease tick which services and er:	re connected to your p	property and give o	letails of the	
Servi	ces	Connected	Supplier

	If you have answered yes below:  (i) Do you have appropriately your septic tank?  (ii) Do you have a maintely less you have a maintely with which you have a maintely with the which	enance contract for your please give details cantenance contract:	ischarge from ur septic tank?	Yes No Yes No Don't know Yes No	
11.	Responsibilities for share		a to the east of	Vac	
a.	Are you aware of any resp anything used jointly, suc road, boundary, or garder If you have answered yes	th as the repair of a shann area?		Yes No Don't know	
b.	Is there a responsibility to the roof, common stairwe If you have answered yes	II or other common are		Yes No Don't know	X
C.	Has there been any major roof during the time you h			Yes No	X

d.	Do you have the right to walk over any of your neighbours' property — for example to put out your rubbish bin or to maintain your boundaries?	Yes No	X
	If you have answered yes, please give details:		
e.	As far as you are aware, do any of your neighbours have the right to walk over your property, for example to put out their rubbish bin or to maintain their boundaries?  If you have answered yes, please give details:	Yes No	X
f.	As far as you are aware, is there a public right of way across any part of your property? (public right of way is a way over which the public has a right to pass, whether or not the land is privately-owned.)  If you have answered yes, please give details:	Yes No	
12.	Charges associated with your property		
a.	Is there a factor or property manager for your property?	Yes	
	If you have answered yes, please provide the name and address, and give details of any deposit held and approximate charges:	No	Lxl
b.	Is there a common buildings insurance policy?  If you have answered yes, is the cost of the insurance included in your monthly/annual factor's charges?	Yes No Don't know	
c.	Please give details of any other charges you have to pay on a regular upkeep of common areas or repair works, for example to a resident maintenance or stair fund.		r
13.	Specialist works		
a.	As far as you are aware, has treatment of dry rot, wet rot, damp or any other specialist work ever been carried out to your property?	Yes No	
	If you have answered yes, please say what the repairs were for, whether you carried out the repairs (and when) or if they were done before you bought the property.		
	As far as you are aware, has any preventative work for dry rot, wet rot, or damp ever been carried out to your property?	Yes No	
b.	If you have answered yes, please give details:		

C.	If you have answered yes to 13(a) or (b), d guarantees relating to this work?  If you have answered yes, these guarantee purchaser and should be given to your so possible for checking. If you do not have to your solicitor or estate agent will arrange You will also need to provide a description out. This may be shown in the original est.  Guarantees are held by:	and ained.	Yes No	x			
14.	Guarantees						
a.	Are there any guarantees or warranties for	r any of tl	he follow	ing:			
		No	Yes	Don't know	With title deeds	Lost	
(i)	Electrical work	X					
(ii)	Roofing	X					
(iii)	Central heating	X					
(iv)	National House Building Council (NHBC)	X					
(v)	Damp course	x					
(vi)	Any other work or installations? (for example, cavity wall insulation, underpinning, indemnity policy)	X					
b.	If you have answered 'yes' or 'with title deeds', please give details of the work or installations to which the guarantee(s) relate(s):						
C.	Are there any outstanding claims under ar listed above?	es	Yes No	X			
	If you have answered yes, please give deta						
15.	Boundaries						
	So far as you are aware, has any boundary of your property been moved in the last 10 years?  If you have answered yes, please give details:				Yes No Don't know		
16.	Notices that affect your property						
	In the past three years have you ever red						
	advising that the owner of a neighbourir	ade a	Yes
